

- Assist: gpt-4o-mini default; gpt-4o for serious cargo / quote chats
- HS Finder: gpt-4o for definitive CTH desk ranking
- Blogs / Digest: gpt-4o writing; content machine auto-publishes on quality gate
- Keys stay server-side only (.env) - never in the browser

## Data

---

- Assist: SQLite (conversations, leads, consent) + Markdown knowledge base + RAG
- HS: Vended India CTH-8 index (~12,475 lines) in JSON; lexical search + AI rerank
- Digest: Scraped notices -> blog-posts.json; syncs published posts to site data file

## 4. Ports and demo URLs (local)

---

```
:5174  Neo Vite website (UI)
:8787  Neo Assist API          /api/assistant/*
:8790  Neo HS Finder API         /api/classify, /api/health
:8791  Digests / Blogs API       /api/blog-posts, /api/machine/*
```

```
Site proxies (Vite):
/api/assistant/*    -> 8787
/api/hs/*           -> 8790
/api/notifications/* -> 8791
```

## 5. Production cutover (what Neo IT needs)

---

- Host the 3 Node services (PM2 / systemd / container) on Neo infra or a small VPS
- Reverse proxy path or subdomain to each API (nginx / Cloudflare / existing Django proxy)
- Set env secrets: OPENAI\_API\_KEY (OpenRouter), OPENAI\_BASE\_URL, SMTP if email required
- Assist: add widget script + data-api-base on Django base template
- Keep DIGEST\_AUTO\_MACHINE=true so blogs keep publishing when CBIC/DGFT updates land
- TLS + CORS locked to neologistics.org

## 6. Repo map

---

```
neo-cha-assistant/      # APIs + widget + content machine
server/                 # Feature 1 Neo Assist
hs-lookup/              # Feature 2 HS / CTH Finder
notifications-digest/   # Feature 3 Digests -> Blogs
widget/                 # Embeddable chat widget
knowledge/              # Approved Markdown KB
.env                   # Secrets (not in git)

connectosWebsite1/neologistics/ # Vite Neo website UI
```

## 7. Out of scope (for clarity)

---

- Container tracking across Kochi/Chennai ports - separate phase, not these 3 APIs
- Replacing Neo's Django CMS wholesale - we slot in; Neo IT owns live hosting cutover
