

INVOICE / BILL

AI infrastructure credits - Pragma Flow (Neo Logistics website tools)

Invoice No: INV-2026-001
Status: Due on receipt

Date: 21 July 2026
Currency: INR (Rs)

FROM (Vendor)

Pragma
Pragma (Technology Studio)
Product & AI systems for logistics and trade
India
26pragmalabs@gmail.com
GSTIN: Not applicable / not registered
UPI: neilajithnair@okhdfcbank

BILL TO (Client)

Neo Logistics
www.neologistics.org
Kochi (Willingdon Island) / Chennai (Egmore), India
customercare@neologistics.org
Project: Pragma Flow - Assist, HS Finder, Customs Digest

1. Charges

Description	Qty	Amount (Rs)
OpenRouter prepaid AI credits (GPT family) - launch wallet for Pragma Flow Features 1-3 (Neo Assist, Neo HS Finder, AI Customs Digest). Includes Pragma setup, key wiring, and live-AI verification (not fallback mode).	1	5,000.00
Subtotal		5,000.00
GST		Nil (no GSTIN)
Amount in words: Rupees Five Thousand Only. TOTAL PAYABLE		Rs 5,000.00

2. What we have right now

- Feature 1 - Neo Assist: chatbot, KB, guardrails, and lead capture are built and demoable.
- Feature 2 - Neo HS Finder: India CTH index (~12,475 lines) live; ranking needs a working AI key.
- Feature 3 - AI Customs Digest: scan + blog pipeline works; posts often fall back to templates without AI.
- Google Gemini paid billing failed (activation error), so tools risk non-AI / template answers at go-live.

3. Why this purchase is required

- All three features share one AI layer for chat, HS ranking/reasoning, and customs summaries.
- OpenRouter prepaid GPT credits have a hard spend ceiling - empty wallet stops usage (predictable cost).
- This invoice covers launch credits + Pragma wiring/verification so Neo Logistics is not stuck in fallback mode.
- Later top-ups are separate and billed only if more usage is needed.

4. How things change after payment

- Pragma loads OpenRouter credits and configures GPT (e.g. gpt-4o-mini for Assist/Digest; stronger GPT for HS).
- Neo Assist answers become live AI grounded in Neo knowledge, not offline templates.
- HS Finder can give clearer primary CTH recommendations with reasoning (CHA confirms before filing).
- Customs Digest can publish real plain-English AI summaries instead of mail-merge fallbacks.
- Neo Logistics can demo and go live with authentic AI behaviour across all three tools.

5. Scope of this invoice

Included in Rs 5,000

- OpenRouter prepaid AI credit load for launch (GPT family via OpenRouter).
- Key setup, environment wiring for Features 1-3, and verification tests.

Not included

- Full Pragma Flow software build / go-live fee (separate commercial proposal).
- Monthly ops retainer, hosting, or Neo IT deployment work.
- Future OpenRouter top-ups beyond this launch wallet.

6. Payment

Please pay Rs 5,000 to Pragma on receipt. On confirmation, Pragma will activate OpenRouter credits and verify all three features on live AI within 1-2 working days.
